

Florida Department of Transportation Bicycle Light Distribution ASSURANCE

Thank you for agreeing to participate in the Bicycle Light Distribution Program. Florida's Pedestrian and Bicycle Strategic Safety Plan defines bicyclists as vulnerable road users. Many bicycle crashes occur at night or during twilight hours and involve cyclists riding without a functioning bicycle light. The purpose of this distribution program is to provide lights to bicyclists who ride at night without a bike light, and who do not have access or the ability to purchase a light for themselves.

This document serves as written assurance that to the best of your ability the bicycle light kits provided to you by the program will be distributed free of charge to **traditionally underserved, transportation disadvantaged populations.**
